Good luck !

Your Name

[Home](#) [Text](#) [List](#) [Form](#)

Question 1

Using **HTML5** and a linked external CSS file, create the interface at the top of this page and save it under **index.html**.

All following questions must be coded within the main section.

General settings

/5

- The html structure must comply to HTML5 regulations.
- There should be no margin to the body and the background should be a small picture that is repeated.
- Default font should be : arial, 16px, black (unless specified otherwise).

Header

/5

- Red background, 100px high, full width.
- Must be positioned over all other content and should not react to scrollbar.
- Content block should be limited to 960px width and be centered horizontally.
- Left part should display your name as a left align heading.
- Right part shows the navigation words right aligned.

Navigation

/5

- Navigation words should be : white and bold not underlined (turn to red on mouseover)

Main

/5

- All content should be limited to 960px width and be centered horizontally with a white background.
- This is where you will be coding the different answers to this exam's questions.

Footer

/5

- Green background, 50px high, full width.
- Must be positioned over main content and should not react to scrollbar.

A title

Voloreiusa quis alit ratum ime cusam
aperferumet apit, nienese vel etus.

Enda de omniendi quam et rendi dis-
serum laudemquas por susciuntis sum.

Temodis cilleni menihil lectorundus in-
ctur ad que quibus exeribus ad exped
etur sitiist.

Question 2

Create the appropriate content and use CSS to style them.

Title

/5

- Create a title (heading): «A title»
Style the heading so it is red and slightly smaller than your name
Use a class named «title».

Text

/5

- Write a few short paragraphs of text in a 400px wide container.
- Style this text using the paragraph tag as a selector to make its content 12 px, green, with 15px of line height.

Picture

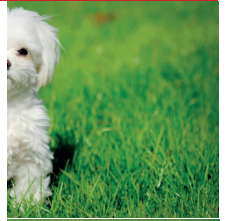

/5

- Position a portrait next to the text, aligned right, approximately the same with as the navigation.

Grocery :

3. Meat
4. Vegetables
5. Fruits

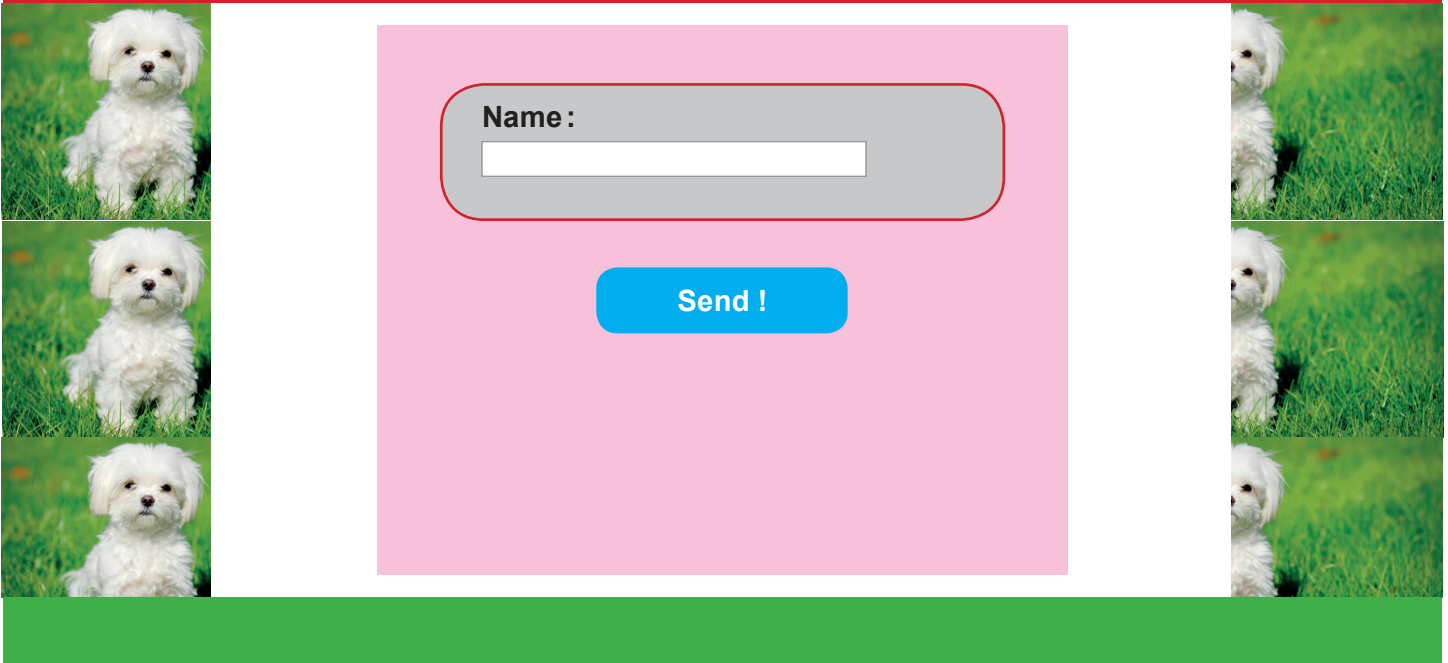

Question 3

Following question 2, create an ordered list.

/5

- Title of the lists should be bold.
- Items should be ordered with numbers.
- List numbering should start with number «2»

The form is centered on a pink background. It features a 'Name:' label followed by a text input field. Below the input field is a blue button labeled 'Send !'. The form is flanked by images of a white dog on a green field.

Question 4

Create a simple form :

/5

- The form container :
 - 500px wide
 - Pink background
 - Centered horizontally
- Create a 350px wide form group using a borderline :
 - 350px wide
 - 1px red borderline
 - Grey background
 - Rounded corners
 - Centered horizontally
- Create a label (Name:), then a field for a single line entry.
- Create a submit button :
 - Positioned out of the form group
 - Blue and containing the word «Send!»
 - 175px wide and 50px high
 - Rounded corners
